Safari Vehicles

Your safari experience will involve many exciting days viewing wildlife. As such, we pay utmost importance to the quality and comfort of your safari vehicle. Our safari vehicles are all converted into custom-built safari cars, with pop-up roof to enable visitors to view wildlife better. All vehicles are fitted with thickly-cushioned individual seats. All 4x4 Safari Land Cruisers carry between 5 and 7 persons, and everyone is guaranteed a window seat. All safari vehicles have two-way radio communication equipment fitted to keep in contact with our offices. An electric fridge, an inverter system for charging your cameras, phones and iPads, a pair of binoculars and reference books on mammals, birds, flora and fauna are all standard equipment in each safari vehicle.

Our Driver-Guides:

When you book you are assured driver-guides who are extensively trained, qualified and experienced. Their knowledge spans over virtually everything you will encounter on safari - the wildlife, flora and fauna, the birdlife, the people and the local culture. Each driver-guide undergoes a rigorous and mandatory training program, and their experience over the years means they are a wealth of information at all times.

Fly-In Safaris

If you are on a fly-in safari you may be required to share your vehicle with other guests at the lodge for transfers and game drives. Vehicles which are based at the camp often have bench-type seating and may have canvas or open sides.
